WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Floor 780 x 430, 6 mm. Side walls 2 x 780 x 160, end walls 2 x 422 x 160, 4 mm. Walls stand on the floor at its edges; the end walls fit between the side walls.

Brackets outside: 10 along the bottom joints (3 per side, 2 per end), 4 up the corners; M4 bolts, washers both sides.

Seal all edges with exterior paint or varnish before assembly.

Four 6.6 mm holes in the floor for the bolts to the bearers, 150 each side of the centre line, 50 and 730 from the rear edge; countersink them from the inside so the pad lies flat.

Pad: 2 mm rubber, 772 x 422, laid loose on the floor.

Strap anchors: one M6 bolt with a large washer through each side wall, 20 up, at 186 and 594 from the rear edge.

Check: four jerrycans drop in 2 x 2 with 2 mm to the walls.
